- With a variable speed range from 10,000 – 21,000 oscillations per minute (OPM), the Multi-Max MM20 offers the ability to complete applications with detail, precision and optimal performance
- A separate on/off switch and speed control retain speed settings for ease of use and the perfect speed every time

Versatility

- The brand's Quick Fit™ accessory interface makes accessory changes twice as fast as similar oscillating tool systems
- The Multi-Max MM20 is compatible with all current Dremel oscillating accessories and boasts new, larger accessories designed to accommodate the tool's increased performance
